A Giant in Food & Dairy Company in Asia

About Client

The company was set up during the Operation Flood, which is also known as the White Revolution in Asia. Covers over 5000 villages and more than 2,00,000 dairy farmers from under its supply network. The current production capacity of the company is 1.5 million litres of milk a day

Opportunity/ Problem Statement

- *Build seamless flow of information between different locations and functions, better control of the processes and for leveraging advances in IT systems for business gains*
- *Building VLC database to interface of Milk data collected across 5000 Village Level Collection centers in two shifts daily, processing of the same and payment settlements in 5 day cycle*
- *Linking of Rate charts based on Milk Fat and SNF at VLCs and Plants for payments and Inventory Valuation*

Solution

- *Implemented S4 HANA 1610 solution*
- *Enhancement in milk payment calculation for Milk Bill and Process Orchestration Interface for capturing DPU Data*
- *Customization for Stock Transfer of Milk from MCC to Manufacturing Plants and Finished Stock to Sales Branches.*
- *Sale on Bike- Process Mapping*
- *Fiori Apps for Transaction and Analytics*

Benefits

- *Dynamic Rate Chart Plug-in*
- *Automation in Payments & Recoveries for all purchases from VSP through Fiori Apps*
- *Process for Sale on Bike which is unique for quick delivery thus reducing turnaround time.*
- *Digital CXO Dashboard*
